

Get the Connection?
Ephesians 4:15-16

The Power of a Connected Life

Femur
(thighbone)

The lateral collateral ligament (LCL) runs on the outside of your knee. It limits sideways motion.

Articular cartilage lines the bones, cushioning your joint.

Patella
(kneecap)

The anterior cruciate ligament (ACL) connects the femur to the tibia in the center of your knee. It limits rotation and the forward motion of the tibia.

The medial collateral ligament (MCL) runs down the inside of your knee joint. It connects the femur to the tibia and limits the sideways motion of your knee.

The meniscus is cartilage that absorbs shock in your joint.

The posterior cruciate ligament (PCL) also connects the femur and tibia. It limits backward motion of the tibia.

Tibia
(shinbone)

***“The Head” is our source
through our connections.***

***Through our connections we
achieve Christlikeness.***

***We neglect our connections
because The Body is “unseen”***

***We neglect our connections
because relationships are hard.***

“What happens in the messiness of relationships is that our hearts are revealed, our weaknesses are exposed, and we start coming to the end of ourselves. Only when this happens do we reach out for the help God alone can provide.”

-Tim Lane, Paul Tripp

***When the connections
function, we grow up, the Body
grows, and it all works for His
glory.***
