

God's Design vs. Odds' Design!
Acts 17:16ff

Design – a composition of elements that display organization and structure.

The universe, both micro and macro, displays an unimaginable degree of design.

The universe was not only created by God, it was designed by God.

The design of creation not only proves the existence of a creator but also tells us the attributes of that creator.

“Every great design begins with an even better story.” – Lorinda Mamo

To embrace a God who is the designer is to discover the design's purpose.

The design of the universe provokes us to ask why we exist.
